The Intenza quality system is certified by the world's leading certification organisation, TUV Rheinland Group, to ISO-9001:2008 standards. Everything we do is built around quality— from product development to production.

The Intenza Philosophy

We believe that problem prevention is more effective, and less costly, than fixing malfunctions. Good product quality begins with the correct product development process. We follow a clearly documented product development system that is rigorously controlled, at each stage, to ensure that every component is well designed, verified and tested before being released for mass production.

How We Work

During production, we automate our process as much as possible to minimise handling and errors, and more attention is focused on quality— Intenza's goal is to minimise waste and errors, and to continuously improve efficiency and quality. In order to achieve our quality goal, we fully assemble each product, and once assembled, run it through a thirty minute burn-in process. Following this protocol, each product is 100% functionally tested to guarantee full working order before shipping.

The Intenza Pledge

To minimise machine down time is Intenza's promise. Our goal is to be the number one in service quality in the industry so all Intenza partners and customers can enjoy hassle-free service.

Entertainment Series

The Intenza Commercial Cardio Entertainment Series features a one of a kind InCare™ customer support. Our unique, innovative technology is designed and built into each Intenza product. Intenza Entertainment Series products will automatically send an alert to the Intenza Customer Service Centre should the product require service attention. Our dedicated Customer Service team will perform troubleshooting, based on information relayed by the product, to inform distributors which parts require attention before the customer calls. Intenza InCare™ online facilitates the delivery of an unsurpassed customer service to support your product service needs. Minimised machine down time allows club and hotel owners to flawlessly serve happy clients and obtain maximum return on investment.

Intenza Entertainment Series products uniquely feature a **screensaver** function that allows club and hotel owners to deliver personalised messages or images to their clientele. 10 easily uploadable slides (1024* 768 resolution) offer club or hotel owners scope to promote their facilities and product offers through the Intenza Entertainment Series Collection.

Our Entertainment Series products feature 15" industrial grade touchscreen monitors which deliver exceptional viewing quality. Users can enjoy **personalised** entertainment with their own playlists and video with connectivity to smart phones and USB. Watching TV on the large built-in screen becomes a pleasure, keeping users entertained during workouts. Packed with features and workout options, yet still so easy to use, you do not need the manual.

Interactive Series

Intenza Commercial Cardio Interactive Series are smart machines with self-diagnostic capabilities built into each product. When service is required, the machine will automatically send an alert. Using a USB, Intenza Service Technicians can simply download information from the machine, and when combined with our automated diagnostic software tool, troubleshooting is made easy. Your Service Technician will be able to replace any part before your customer realises the product needs attention.

Frequently users select **Quick Start** in order to bypass learning complicated button sequences to access sophisticated workout options. Our Interactive Series products feature Intenza's unique **Uni-Dial™ navigation control**, a one dial switch that eliminates confusing buttons. Once users learn that all choices and selections are easily made by operating the dial— simply turn and press, and guided by the instructions on display, they can easily and quickly access all the programs designed to deliver fun and effective workout results.

Everyone has a busy lifestyle. Members just want to come in, workout to get maximum results, and get back to their life. With Intenza Interactive Series products exercising effectively, within a given time, can easily be accomplished. Our **InZone™ heart rate monitoring** system provides visual colour feedback to help optimise workout efforts for maximum results based on heart rate level. **InZone™** encourages users to train in their target heart rate zone for all workout options offered by Intenza products which can be used with both telemetry and contact heart rate systems. Optional heart rate transmitter strap is required for our built in Polar coded wireless telemetry system.

Intenza's robust frame structure, designed to ensure stability, durability and reliability, offers the most value and best return on investment.

Intenza Elliptical Trainers provide low impact total body training, incline feature, ease of use and centre control at your fingertips.

- Self-powered Interactive Series offers hotel and club owners flexible floorplanning.
- Robust frame structure designed to ensure stability and durability.
- Aluminum front post delivers aesthetic appeal.
- Adjustable incline feature offers users training options and diverse workout experiences.
- Synchronised upper body and lower body movement increase users' overall total body fitness.
- Ergonomically positioned centre control allows users to easily adjust incline, resistance and monitor heart rate during workout.
- All Intenza products feature coded Polar telemetry technology to avoid cross talk in the club or hotel environment for safety reasons.
- Intenza's digital contact heart rate system ensures precision and accuracy.

Intenza products are environmentally friendly with a minimised carbon footprint— all our products meet EuP Directive. All Intenza Entertainment Bikes and Elliptical Trainer offer ECO power saving.

Intenza products deliver exceptional performance, comfort and ease of use in a sustainable design.

- All Intenza products meet EuP Directive and in stand-by mode our products consume less than 0.5 watts, significantly reducing utility bills for clubs and hotels.
- Intenza Entertainment Bikes are designed to be eco-efficient and environmentally friendly. The 15" monitor will display the ECO sign to indicate that the equipment is being powered by the users' efforts.
- All Intenza Bikes comply with EN-957 Studio Class A Directives.
- Intenza's self-powered hybrid generator delivers a consistent and powerful performance.
- Belt drive system enhances user experience to enjoy a smooth and quiet workout.
- Handlebars integrated with digital contact heart rate and resistance adjustment buttons for ease of use.
- Seat back designed with lumbar support and ventilation deliver maximum support during the most rigorous workouts.
- Solid robust frame with low cross over design ensures ease of getting on and dismounting.

Intense

Intenza offers a wide variety of workout choices to users of all types— from the sedate to the athletic, from the leisure to the competitive, there is an option to satisfy every need.

Our OptiTrain™ System offers users the tools to train effectively and yield compelling workout results.

- Bike mode offers workout at a fixed resistance level regardless of pedal speed.
- Power mode offers the opportunity to workout at a fixed workload measured in watts.
- Unique Intenza race program offers fun challenges— be the champion, upload your name and challenge others to beat your score.
- Fitness test program determines whether users' exercise efforts yield improvements over time.
- Set up Target Heart rate program is easy and effective to yield results.
- Customise workouts and save to USB for later use.
- Workout results are downloadable to USB for work rate analysis and performance training purposes or to simply keep track of your exercise.
- 40 resistance levels.
- Wide range of wattage satisfies the spectrum of users from the sedate individual to high performance athletes.
- Precisely angled seat adjustment at 1/2" increments allow users to adjust seat height for correct knee over pedal spindle position ensuring correct lower body biomechanics and reduction of pressure on knees for enhanced riding comfort.
