KEISER[®]

THE M3i INDOOR GROUP CYCLE

KEISER INTRODUCES INTELLIGENT CYCLING AND THE MOST TECHNOLOGICALLY ADVANCED INDOOR GROUP CYCLE IN THE INDUSTRY!

The company that revolutionized indoor group cycling with magnetic resistance, the first bike with a computer, and who made power an industry training standard, now introduces the most technologically advanced indoor group cycle ever, the Keiser M3i featuring **Bluetooth wireless display**. The new Keiser Bluetooth wireless

computer is certain to become popular with both riders and group exercise instructors. The computer can transmit to a receiver for projection onto a screen and can also partner up with a wireless phone or tablet. At first glance the Keiser M3i catches the eye with a sexy new black color scheme that also features a red flywheel guard.

Bluetooth wireless technology

Revolutionary new display!

Simpler seat adjustment pin

Upgraded black saddle

New positive lock seat & handle bar adjustment pull-pin

Sexy new black body

WORLD'S FIRST

The first indoor fitness cycle:
 - to harness bluetooth connectivity
 - to pass EN ISO 20957-1 accuracy test
